EWS . HPC-Line

The new HPC-Line (high pressure ceramic) from EWS sets new standards for driven tools with axial and radial rotary feedthrough.

Advantages

- For driven tools with axial and radial rotary feedthrough
- High speed up to 12,000 / min
- 0 – 70 bar coolant pressure
- MMS (Minimum quantity lubrication)
- Dry-running without limitation
- Flexible use
- Extrem reduzierte Wärmeentwicklung durch Reibwertoptimierung
- High-precision ceramic-coated sealing elements for a long lifetime
